REPORT:

- 1) What is the SI unit for Mass?
- 2) What does calibrate the scale mean?
- 3) How would you calculate the number of milligrams for each of your observations?
- 4) How would you calculate the number of kilograms for each of your observations?
- 5) What is the difference between mass and weight?

6) If you did this activity on the moon, would the results change? Why?
